

SONOS STUDIO

Shoreditch, London, UK

SONOS STUDIO

LOCATION: Shoreditch, London, UK

CLIENT: Sonos

VALUE: £1.4m

Gariff acted as the principal contractor on the conversion of this Shoreditch building into a home for the modern audio system company, Sonos. The London studio consists of a concert space, listening rooms, work stations and a café. Work began with the interior demolition of the site followed by a completely new fit-out featuring custom-built interchangeable ceiling panels and rotating wall louvres which fulfil the acute acoustic requirements, and determine the feel of the interiors. Natural materials, such as reclaimed timber flooring, sourced from the old BBC Broadcast House, were employed throughout to create a welcoming, homely feel.

TYPE: Corporate

ARCHITECT: Brinkworth
